Our trees are grown on high pine land, set far apart, and are stronger and hardier than those grown under other conditions. We have no white fly, cushion scale or like insect pests. We have been in the business for twenty-five years, and have sifted out the less important varieties until we think we have all you need in a very small number. It is a big mistake to plant too many kinds, as you thereby have too many odds and ends in shipping. Late, Midseason and Early are all you need, if you get the best. Send for circulars and prices. **WE PAY THE FREIGHT.**
